$$+ B^2 \times (D^2 + \sqrt{B^2})$$

$$B + Y + 2C + 2Z = \sqrt{V^2 + V^3 + X}$$

$$\begin{aligned} X &= \sqrt{A+B+C^2} \\ &= \sqrt{ABC^2+2} \\ &= ABC^2 \end{aligned}$$

$$R^2 = 3AB + 2C\sqrt{2}$$

$$= 32 + C\sqrt{2}$$
